

# TEST WINNER

PHOTON MODULE TEST  
**2008 AND 2009**

The independent Photon magazine  
confirms: SolarWorld<sup>®</sup> is test  
winner. Up to 12% more yield!

**NEW! LINEAR PERFORMANCE GUARANTEE\***  
**FOR THE HIGHEST INVESTMENT SECURITY!**

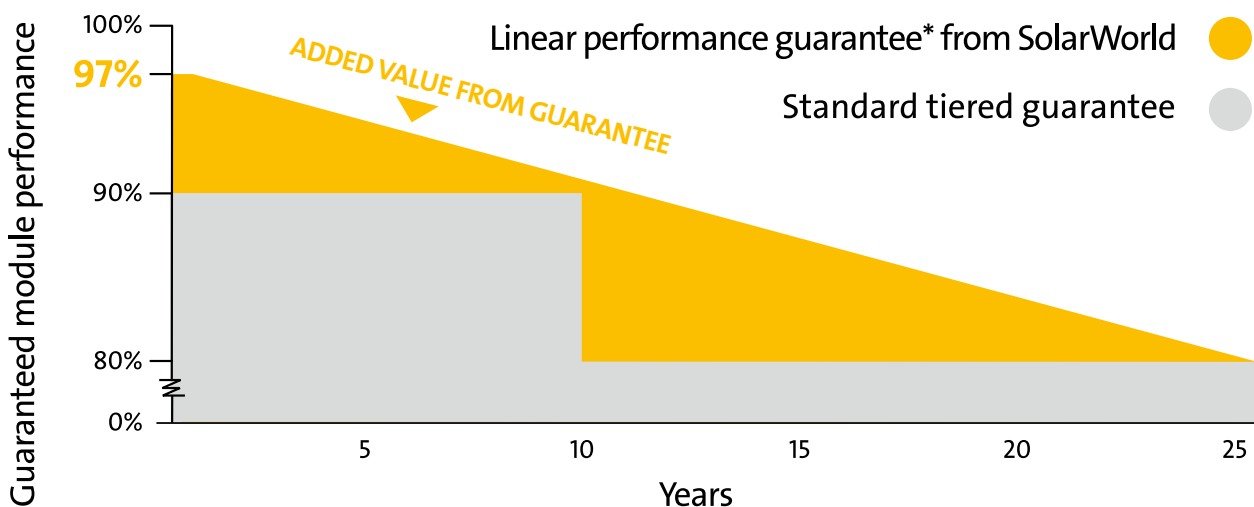

# LINEAR PERFORMANCE GUARANTEE

## STRAIGHTFORWARD SECURITY

If you produce maximum quality, you can provide a maximum guarantee. SolarWorld is the first solar company to offer a linear 25-year performance guarantee\* for all modules installed as of January 1, 2010.

According to the guarantee, the actual power of a new module cannot deviate from the specified rated power by more than three percent. SolarWorld guarantees that the power will not decrease by more than 0.7 percent of the rated power per year on average. For example, SolarWorld guarantees performance at 95.6 percent in the third year – clear added value compared to standard guarantees, which promise only 90 percent and can even drop to 80 percent over time.

SolarWorld also offers a five-year extended product warranty\*, which goes well beyond the two years required by law. This way, our warranties provide double protection for our customers' investments.

Clear added value compared to standard tiered guarantees.

The success proves us right: SolarWorld modules were the winners of the 2008 and 2009 independent long-term tests by Photon, standing out with the best power and yields.

**We turn sunlight into power.**
